

A SINGER INDUSTRIAL COMPANY

SPECIALTY HOSES FOR RESTAURANT EQUIPMENT MANUFACTURING

You work hard to build your brand and the components that go into your equipment need to match your expectations for consistency and life expectancy.

We recognize the need for quality and consistency in both bulk and finished hose assemblies. We work with best-in-class manufacturing to design and build products that will meet the performance expectations of your customers. From hose products and couplings to molded rubber and elastomer seals our experts are here to help you.

SPECIALTY HOSES

FOR RESTAURANT EQUIPMENT MANUFACTURING

Our commitment to product quality and innovation support the restaurant equipment manufacturing industry with products specifically designed to meet your needs.

We've designed specific supply and drain hoses, supply hoses, door seals and gromets all to meet the rigorous application of commercial restaurant equipment. Special efforts is made to select the correct elastomer compounds to meet food industry standards. Give us a call today and talk to experts to review your product needs.
