HOSE & FITTINGS

A SINGER INDUSTRIAL COMPANY

LEAF AND LAWN COLLECTION PRODUCTS FLEXAUST™ PRODUCTS MADE TO MEET YOUR NEEDS

Need for grass and leaf cleanup comes every Spring and Fall; you can rely on experts that understand your applications to connect you with products that are fit for the application.

Grass and leaf collection ducting need to hold up to environmental wear and tear. Ducting also needs to be flexible for routing and installation as aftermarket solutions for your equipment.

Our partnership with Flexaust™ helps us provide a variety of solutions from economy homeowner to high abrasion resistant commercial ducting; we are here to help. Call us to determine what meets your needs.

LEAF AND LAWN COLLECTION PRODUCTS

Leaf and lawn collection ducting comes in a variety of options depending on your application and needs. Lighter weight and more economical ducting options include PVC, Polypropylene, and Rubber offer flexible solutions for this application.

There are various options for industrial applications with heavy duty polyurethane construction providing superior abrasion and ozone resistance. Trust the experts and give us a call now to identify the leaf and lawn collection product that is right for your application.

LEAF AND LAWN COLLECTION PRODUCTS

Residential

Flex-Tube® PV

- Construction: Clear PVC Duct with Black Helix
- Application: Economical, ultra smooth interior, crush resistant
- Size: 4"-12"
- Temperature: 20° to 160°

Flex-Tube® PU

- Construction: Clear polyurethane with rigid yellow ABS helix
- Application: Great abrasion resistance, ultra smooth interior, crush resistant, puncture / tear resistant
- Size: 4"-12"
- Temperature: -40° to 200°

Commercial

Flexadux® LCDC

- Construction: Polypropylene blend hose reinforced with a spring steel wire helix
- Application: Economical, light weight, drag resistant, long flex life with good abrasion and tear resistance
- Size: 8"-12"
- Temperature: -30° to 200°

Flexadux® HT-W

- Construction: Clear thermoplastic ether-based polyurethane with rigid yellow ABS helix
- Application: Great moisture and UV resistance, external wearstrip offers additional, drag resistance
- Size: 8"-12"
- Temperature: -60° to 270°

Municipal

Flex-Thane® HD

- Construction: Polyurethane hose reinforced with a bronze coated spring steel wire helix
- Application: Superior abrasion resistance & tear strength, Ideal for leaf and debris collection, great moisture, and UV resistance
- Size: 12"-18"
- Temperature: -65° to 200°

Flexadux® HT-W

- Construction: Clear thermoplastic ether-based polyurethane with rigid yellow ABS helix
- Application: Great abrasion resistance & higher tear strength, severe service & debris collection, great moisture, and UV resistance
- Size: 12"-18"
- Temperature: -60° to 270°
